NASHVILLE, Tenn. (Nov. 19th, 2026) — Bridgestone is continuing its long-standing partnership with Lamborghini as the exclusive tire partner for the new Lamborghini Temerario Spyder. As Lamborghini's Official Technical Partner, Bridgestone is extending to the open-top model the complete tire line-up developed for the Temerario Coupé, supporting performance on road and track as well as in winter driving conditions.

The Temerario Spyder combines the architecture and dynamic character of the Temerario Coupé with the sensory experience of open-air driving. Its 4.0-liter twin-turbo V8 is integrated with three electric motors, delivering a combined 920 CV (677 kW). The V8 revs to 10,000 rpm in normal operation, with the limit raised to 10,250 rpm when Launch Control is engaged – the

highest engine speed of any series-production open-top super sports car with a turbocharged engine. Temerario Spyder accelerates from 0 to 62 mph in 2.8 seconds and from 0 to 124 mph in 7.3 seconds, reaching a top speed of 213 mph.

"The Temerario Spyder brings a new open-air dimension to Lamborghini's electrified super sports car range, and we are proud to continue our collaboration as its exclusive tire partner," said Adrien Thormann, Director Europe Consumer OE Sales. "By extending to the Spyder the Potenza and Blizzak 6 fitments already developed for the Temerario Coupé, we support the vehicle's distinctive performance character across road, track and winter driving."

A complete tire line-up for road, track and winter

Building on its strong motorsport legacy, Bridgestone used its iconic Potenza tire line for the Temerario Coupé's summer and track fitments, developing Potenza Sport and Potenza Race tires for the model. Temerario Spyder adopts the same Potenza Sport fitment, whose distinctive tread pattern is designed to maximize dry and wet handling and high-speed performance, helping bring out the open-top super sports car's sporting character.

Alongside the standard ultra-high-performance fitment, a run-flat homologated version of Potenza Sport tire is also available. It allows the vehicle to continue for up to 50 miles at speeds up to 50 mph following a loss of tire pressure, subject to the applicable operating conditions[1]. The same fitment is available on Temerario Spyder, combining grip, traction and road comfort with Run-Flat technology.

Potenza Race is also available for Temerario Spyder, designed to provide excellent grip, enhanced handling and high performance for track driving. Its high level of grip is enabled by a compound developed for track use and subsequently transferred to road applications.

Completing the line-up, the Blizzak 6 winter fitment developed for Temerario is also available

for the Spyder, supporting performance in winter driving conditions.

"A long-standing partnership with a technical partner of proven excellence such as Bridgestone represents an important added value for the Temerario range," says Francesco Milicia, Marketing Director of Automobili Lamborghini. "Temerario Spyder, the first Lamborghini Spyder to feature a retractable hard top, adopts the same tire portfolio developed for the Temerario Coupé. Extending this proven technical package to the open-top model helps the Spyder deliver top-level performance, precision and confidence in different driving conditions, while maintaining the consistent dynamic character that defines the Temerario family."

Developed and manufactured in Europe, the Temerario tire line-up available for the Spyder comprises eight sizes across 20-inch and 21-inch diameters.
